

7TH ANNUAL CHALCHIUTLICUE

ENVIRONMENTAL JUSTICE SUMMIT & CEREMONY

Dear Partner in Education:

We invite you to collaborate in the 7th Annual Chalchiutlicue Environmental Summit on May 20, 2011. For seven years, we have been seeking out the best and brightest in environmental educators, students, scientists, artists and activists to share, learn and plan together for the issues and concerns that are most important to our local communities.

In that time, we have educated an average of 300 people per year on a variety of community-determined issues of importance such as water quality, watersheds, waste reduction and toxicity reduction. We have co-hosted over 100 student presentations on environmental issues as diverse as community safety, climate change, household toxic exposure and the effects of the housing market on local environments.

Today we extend this sincere invitation to collaborate with us so that we may reach our goal of having at least 20 schools presenting to over 300 students in grades 7-12.

Registration is now open and space is limited, so please let us know if you think this opportunity is something that you are interested in. We are currently giving an open call for:

- *Students, staff, parents and community members to attend the Summit*
- *Proposals for workshops & presentations (with focus on grades 7-12 presenting)*
- *Information tables and exhibitor space*
- *Volunteers*

If you are interested, please visit our website and register online. During the registration process, you can also propose your idea for a presentation, request exhibitor and information table space, or offer to volunteer!

Please call or email us should you have any questions.

Thank you for your collaboration!

Sincerely,

The Chalchiutlicue Coordinating Committee
